Summary

I am an **Information and Communication Technologies Analyst**. I work as a Fullstack Developer with over 3 years of experience building web applications using technologies such as React and TypeScript. I have the ability to implement efficient and optimized frontend architectures, as well as manage API integrations. I stand out for my focus on user experience, solving complex problems in collaborative environments, and leveraging AI tools to optimize development workflows and raise code quality.

Skills

Languages: TypeScript, JavaScript, HTML, CSS, C#, Java, Python, SQL and Bash.

Frameworks: React, Next.js, ASP.NET Core, ASP.NET Framework, Blazor.

Databases: MySQL, SQL Server, SQLite and Entity Framework Core.

Technologies: Git, Docker, REST API, GraphQL, Tailwind, Axios, React Query, Vue Query and design patterns.

Education

- Information and Communication Technologies Analyst - UNLP (National University of La Plata).

Work Experience

- **Full Stack Developer - Xirect Software Solutions**

United States, Utah · Remote · June 2025 - Present

- Frontend and backend development for an academy management system: Implemented scalable architectures using React and optimized communication between frontend and backend through RESTful APIs, ensuring a smooth user experience.
- Payment system integration with Stripe: Integrated Stripe API for secure payments and subscription management.
- Dynamic integration of external services: Used React Query to ensure real-time data synchronization.
- Database query optimization: Refactored SQL queries in SQL Server Management Studio, improving performance on critical operations.
- Teamwork: Effective collaboration with other developers and PMs to meet project goals.
- Problem solving: Analytical approach to finding efficient solutions in complex contexts.

- **Full Stack Developer** - Raíz Digital

Argentina, La Plata · Remote · February 2024 - June 2025

- Development of Delivery Voy.
- Implementation of secure authentication using JWT tokens to manage user access.
- Configuration of automated email delivery and push notifications.
- Development of a subscription management system for stores, including administrative roles.
- Creation of an interactive map displaying the user's real-time location.
- Design of a responsive user interface, optimizing the overall user experience.

■ Languages

- **Spanish**: native proficiency.
- **English**: intermediate level.
- **Korean**: beginner level.

■ Projects

- **Insurance Management System**

June 2023

- Technologies used: ASP.NET Core, Blazor, Entity Framework Core, SQLite.
- Developed a web application for vehicle insurance management, featuring entity management and data persistence.
